

NADIR HOSSAIN

Video Editor — eCommerce & Performance Marketing Creative

Bangladesh | nadirhossen2004@gmail.com | [01754958495] | nadir204.github.io | github.com/nadir204

■ PROFESSIONAL SUMMARY

Performance-focused video editor specializing in eCommerce and social advertising, shaping Meta and TikTok ad creatives built around strong hooks, retention-driven pacing, and clear calls to action. Skilled across storytelling, motion graphics, color correction, sound design, and caption-driven UGC editing for fast-paced social feeds. Brings a Computer Science background that adds a technical, analytical edge to creative decision-making and speeds up adoption of new tools and workflows. A fast learner who takes feedback well and collaborates smoothly with remote, cross-functional teams.

■ CORE SKILLS

Video Editing: Adobe Premiere Pro • Adobe After Effects • Motion Graphics • Color Correction • Sound Design • Storytelling • Short-Form Content • UGC Editing • Meta Ads • TikTok Ads • Performance Marketing • Retention Editing • Creative Strategy • Fast-Paced Editing

Programming: JavaScript • HTML • CSS • Java • C • C++ • SQL • Spring Boot • H2 Database • Node.js • Git • GitHub

Tools: VS Code • IntelliJ IDEA • Adobe Premiere Pro • Adobe After Effects • Photoshop • GitHub • Figma (Basic)

■ PROJECTS

eCommerce Video Advertising — *Premiere Pro, After Effects*

- Edited a wide range of performance-focused ad creatives for paid social campaigns, including UGC, product ads, motion graphics, and clay animation ads for Meta and TikTok
- Applied hook-driven openings, retention-focused pacing, and platform-native captioning to support watch time and conversions

Windows XP-Style Interactive Portfolio — *HTML, CSS, JavaScript · nadir204.github.io*

- Built a fully interactive, Windows XP-inspired desktop portfolio with a custom window manager, draggable/resizable windows, taskbar, and a procedural Web Audio-based sound engine; modular architecture, fully responsive, deployed on GitHub Pages

Spring Boot AI Chatbot — **Team Lead** — *Java, Spring Boot, Spring Data JPA, H2 Database, Groq API (LLaMA 3)*

- Led a university team to build a full-stack chatbot with real-time AI responses via the Groq LLaMA 3 API, a vanilla JS frontend, and complete technical documentation and presentation

Hostel Room Allocation System — *SQL, Java*

- Designed a relational database system to manage and automate hostel room allocation

Polling Application — *Spring Boot, H2 Database, JavaScript*

- Developed a web-based polling application with real-time result handling
